

Mineral Profile

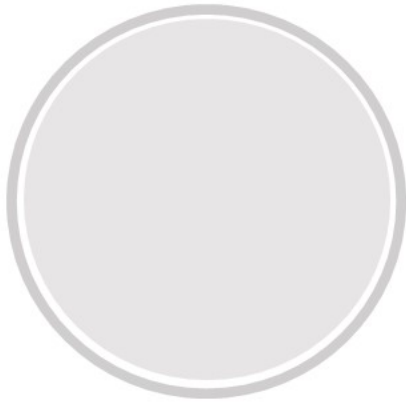

Directions:

Research a mineral and make an Instagram profile for that mineral (see the following page). Be creative! Use images and the bio descriptions to answer the following questions:

- What is its chemical formula?
- How is it formed?
- What properties does it commonly have?
- What is it used for?

You can use the following site or others for information and a list of minerals to choose from: <https://geology.com/minerals/>.
